

Second quarter U.S. economic growth picked up, driven almost entirely by increased consumption. The labor market is gradually nearing full employment. Inflation is well below the Fed's two percent target in both the core CPI and the full index, with little expected acceleration. Over the past month, stock prices have returned some of their 2017 gains, equity market volatility is up, U.S. borrowing costs are down, and the otherwise overvalued dollar has weakened against major trading partners.

Economic Growth and Employment

Real gross domestic product (GDP)

(Quarterly percent change, seasonally-adjusted annual rate)

Civilian unemployment rate (percent)

Unemployed and looking for work (U3 rate)

Inflation and Prices

Consumer price index (CPI) (annual percent change)

5-year expected annual inflation rate:
Sep 14, 2017: 2.0% (FRED: T5YIFR)

CPI components (annual percent change)
