

# Macro and Markets Dashboard: United States

Updated: July 25, 2017

First quarter U.S. economic growth slowed from lower consumption spending growth, despite an improvement in exports. The unemployment rate is gradually nearing its long-run full-capacity level. Inflation is below two percent in both the core CPI and the full index, with no expected acceleration. Elevated consumer confidence and P/E ratios, with near long-term low equity market volatility, show an extraordinary level of optimism. The yield curve for government debt has flattened while the dollar remains strong.

## Economic Growth and Employment

### Real Gross Domestic Product (GDP)

(Quarterly percent change, seasonally-adjusted annual rate)

### Civilian unemployment rate (percent)

## Inflation and Prices

### Consumer price index (CPI) (annual percent change)

### CPI components (annual percent change)

## Markets, Interest Rates, and Other Indicators

### S&P 500 Reported Earnings per Share by Industry

### Recent market developments and other key indicators
