## About the Dashboard

The Macro and Markets Dashboard for the United States contains more than 100 indicators of the performance of the U.S. economy. The dashboard includes twelve categories of charts, grouped by sector or market, and a table of exchange rates.

Dashboard plots follow a uniform design. The line plots show trends over the past decade, while the horizontal bar plots decompose recent developments. The latest value and its reference period are listed in the bottom left corner of the plot area for line plots. Below each plot is a brief listing of the source with a link (in blue) to the source data.

## Chart of the week

■ Markets are expecting more inflation over the coming years, increasing the yield required on nominal bonds

Source: FRED: ten-year breakeven inflation rate: [T10YIE](#); five-year breakeven inflation rate: [T5YIE](#)

Long-term treasury bond yields rose following Trump's victory in the U.S. election. The breakeven inflation rate above explains some of the bond yield increase as a response to increases in expected inflation.
