## About the Dashboard

The Macro and Markets Dashboard for the United States contains more than 100 indicators of the performance of the U.S. economy. The dashboard includes twelve categories of charts, and a table of exchange rates.

Dashboard plots follow a uniform design. The line plots show trends over the past decade, while the horizontal bar plots decompose recent developments. The latest value and its reference period are listed in the bottom left corner of the plot area for line plots. Below each plot is a brief listing of the source with a link (in blue) to the source data.

## Chart of the week

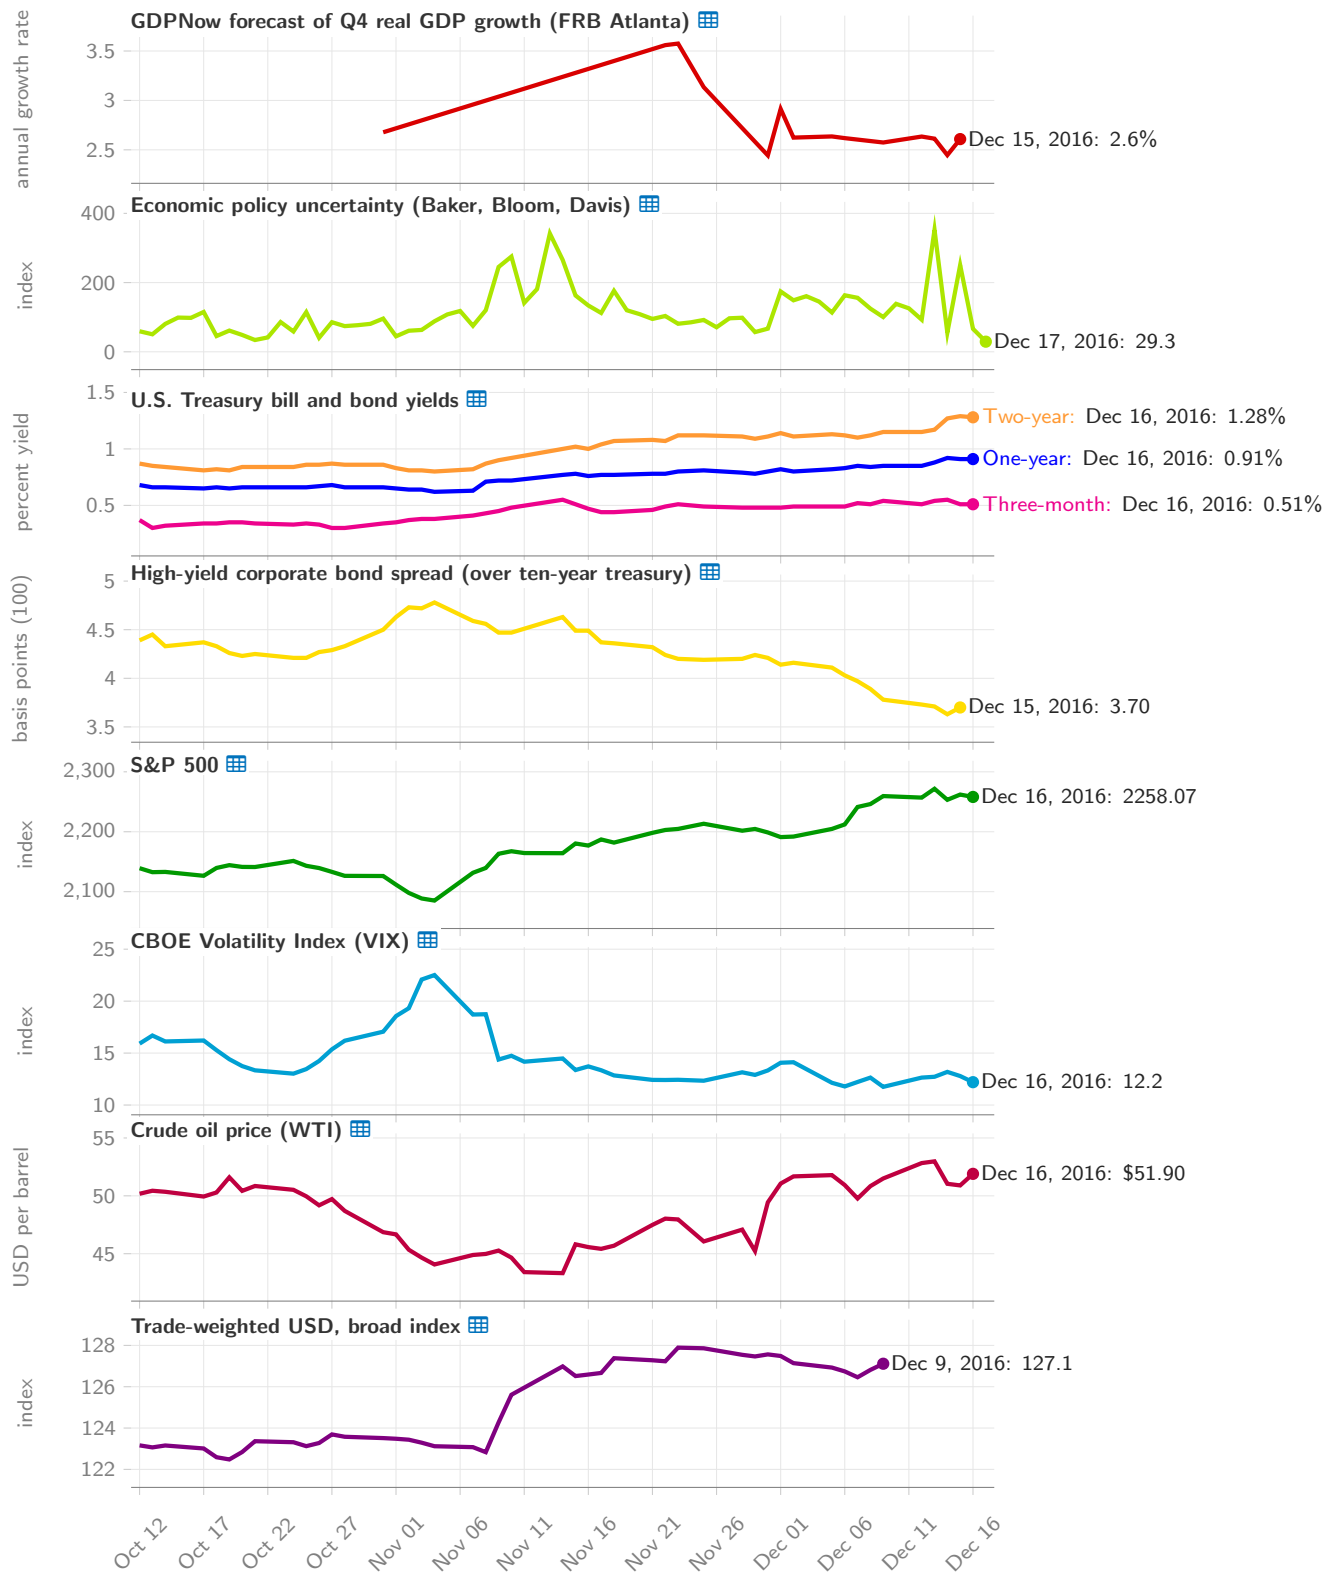

■ Interest rates increase following the FOMC meeting conclusion on December 14

Source: FRED: DGS2; DFF

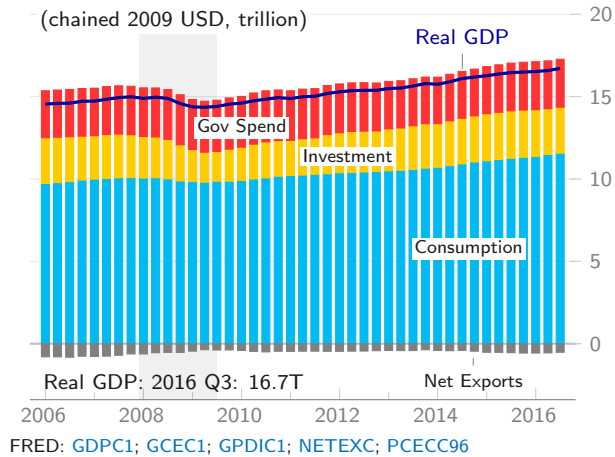

Markets had already priced in the FOMC's 25 basis point hike but were surprised by both the shift in committee members expected rate hike path to 3 hikes in 2017 and in Chair Yellen's more hawkish tone during the press conference. Interest rates on treasuries increased in line with the rate hike before the meeting and increased again following the arguably hawkish surprise.
