About the Dashboard

The Macro and Markets Dashboard for the United States contains more than 100 indicators of the performance of the U.S. economy. The dashboard includes twelve categories of charts, and a table of exchange rates.

Dashboard plots follow a uniform design. The line plots show trends over the past decade, while the horizontal bar plots decompose recent developments. The latest value and its reference period are listed in the bottom left corner of the plot area for line plots. Below each plot is a brief listing of the source with a link (in blue) to the source data.

Chart of the week

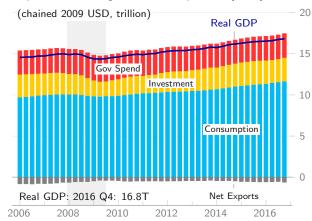

While quarterly GDP growth slowed from 3.5% in Q3 to 1.9% in the BEA's latest estimate for 2016 Q4, business investment rebounded. For 2016 as a whole, business investment growth was non-existent, a result of weak earnings growth in some sectors (e.g. mining, energy) and a general corporate preference for returning profits directly to shareholders through buybacks and dividends. By investment type, aggregate equipment investment, shown above in light blue, critically increased in Q4 over its Q3 level, but remains below its 2015 level. In 2017, tax and trade policies, input prices, and consumption behavior will affect corporate profits, which, combined with the cost of capital and perceived future business prospects, will determine investment.

High-frequency indicators

Macroeconomic Indicators: Overview

Components of real gross domestic product (GDP)

FRED: GDPC1; GCEC1; GPDIC1; NETEXC; PCECC96

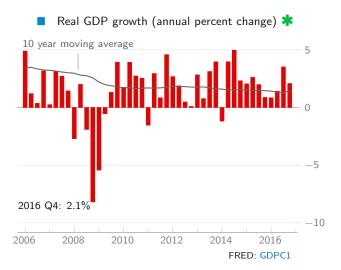

Gross domestic investment (GDI)

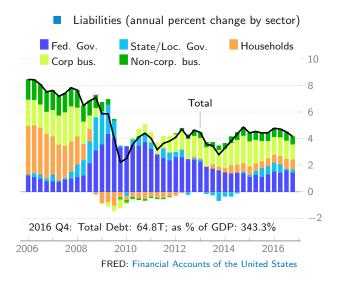

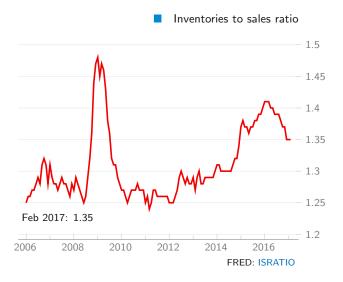

FRED: Saving and Investment by Sector

Retail sales excluding food (annual percent change) *

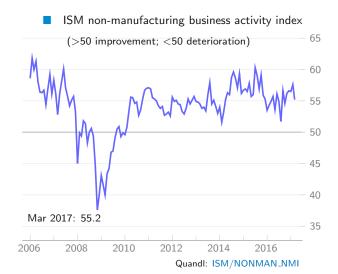

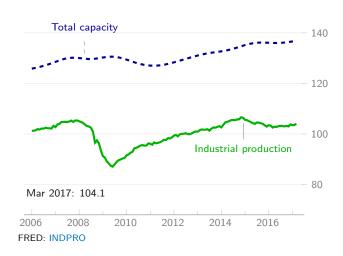

Macroeconomic Indicators: Businesses

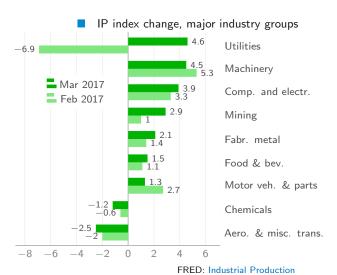

■ ISM manufacturing purchasing managers' index

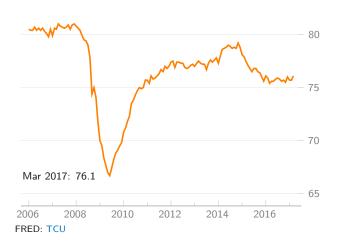

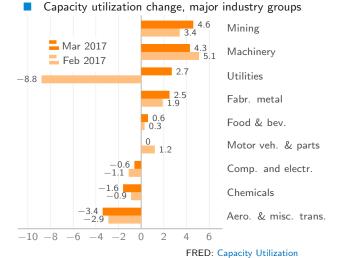

Industrial production (IP) index (2012=100) *

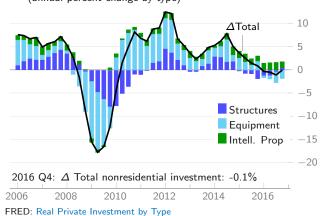

Total capacity utilization (percent of capacity)

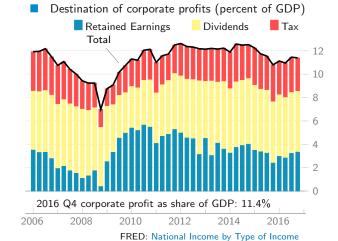

4

Real nonresidential fixed investment (annual percent change by type)

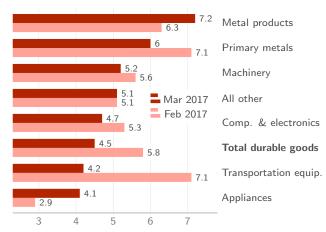

Durable goods new orders (annual percent change) *

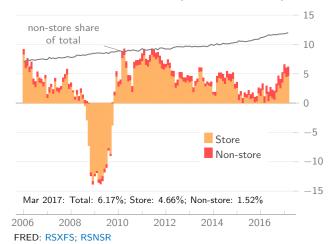

Durable goods new orders by category

FRED: Manufacturer's Shipments, Inventories, and Orders (M3) Survey

Retail sales, store vs. non-store (annual growth rate)

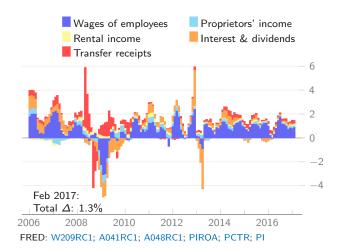

FRBSF tech pulse index (2000=100)

Macroeconomic Indicators: Households

Personal income (annual percent change by type)

Personal consumption expenditure (PCE)

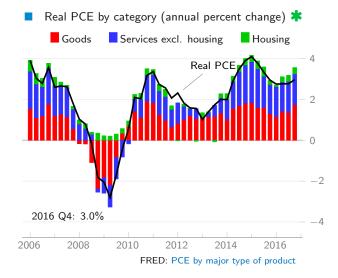

Real PCE on goods by type (annual percent change)

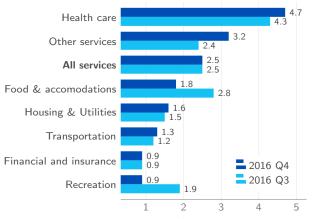

FRED: Real PCE by Major Type of Product

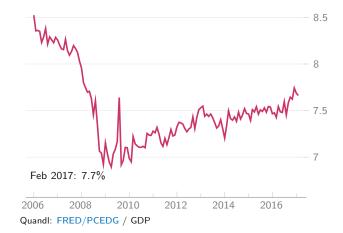

Real PCE on services by type (annual percent change)

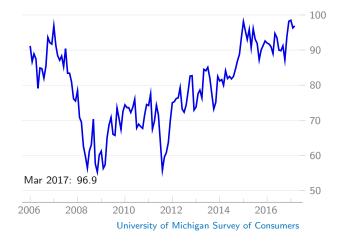

FRED: Real PCE by Major Type of Product

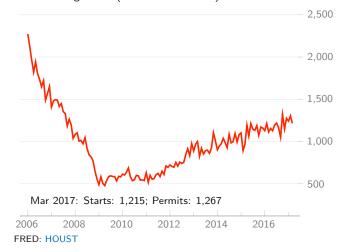

PCE on durable goods (percent of GDP) *

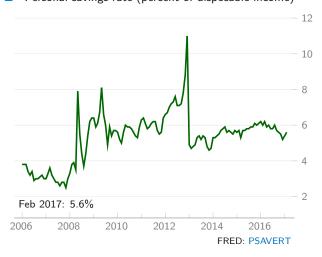

■ University of Michigan consumer sentiment index

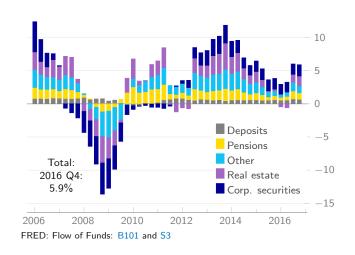

New housing starts (thousands of units)

Personal savings rate (percent of disposable income)

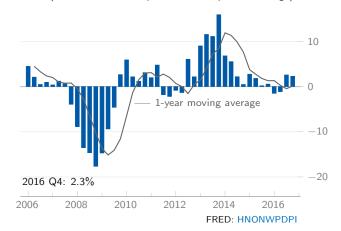

■ Household and nonprofits assets (annual growth rate)

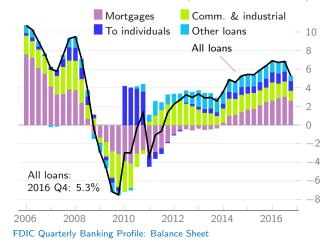

Net wealth as percent of gross disposable income

(households and nonprofits, annual percent change) — 20

Depository Corporations

Value of bank loans by loan type (annual percent change)

Domestic loans and deposits (annual percent change)

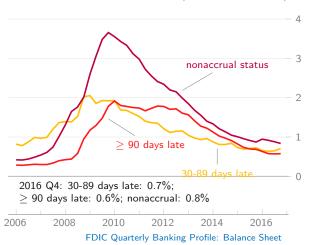

Domestic deposits (annual percent change)

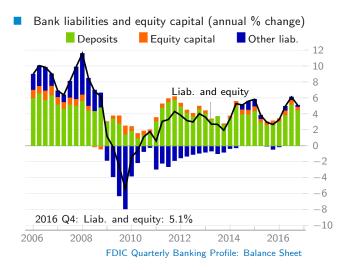

Bank assets by major type (annual percent change)

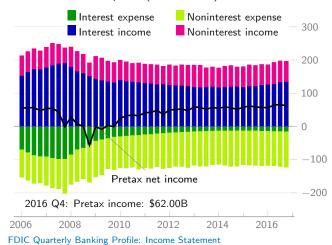

Noncurrent loans (share of total loans)

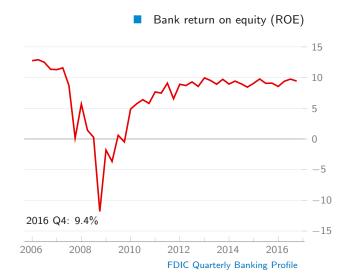

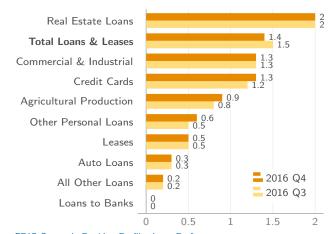

8

■ Bank income and expense (USD billions)

Noncurrent rate by loan type *

FDIC Quarterly Banking Profile: Loan Performance

Loans to assets ratio by total bank assets (percent of loans) \$100M-\$1B \$1-10B 70 \$100M 60 > \$10B 50 2016 Q4: < \$100M: 58.5%; \$100M-1B: 66.7%; \$1B-10B: 69.3%; > \$10B: 47.2% 2006 2008 2010 2012 2014 2016
