About the Dashboard

The Macro and Markets Dashboard for the United States contains more than 100 indicators of the performance of the U.S. economy. The dashboard includes twelve categories of charts, and a table of exchange rates.

Dashboard plots follow a uniform design. The line plots show trends over the past decade, while the horizontal bar plots decompose recent developments. The latest value and its reference period are listed in the bottom left corner of the plot area for line plots. Below each plot is a brief listing of the source with a link (in blue) to the source data.

Chart of the week

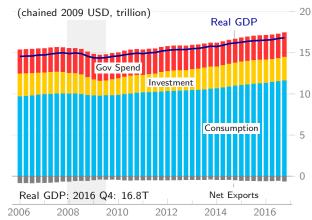

While quarterly GDP growth slowed from 3.5% in Q3 to 1.9% in the BEA's advance estimate for 2016 Q4, business investment rebounded. For 2016 as a whole, business investment growth was non-existent, a result of weak earnings growth in some sectors (e.g. mining, energy) and a general corporate preference for returning profits directly to shareholders through buybacks and dividends. By investment type, aggregate equipment investment, shown above in light blue, critically increased in Q4 over its Q3 level, but remains below its 2015 level. In 2017, tax and trade policies, input prices, and consumption behavior will affect corporate profits, which, combined with the cost of capital and perceived future business prospects, will determine investment.

High-frequency indicators

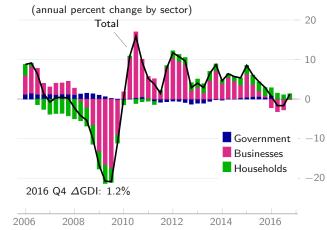

Macroeconomic Indicators: Overview

Components of real gross domestic product (GDP)

FRED: GDPC1; GCEC1; GPDIC1; NETEXC; PCECC96

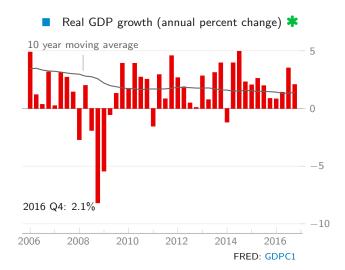

■ Gross domestic investment (GDI)

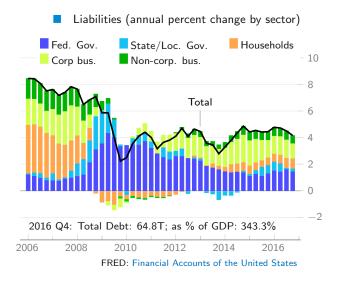

FRED: Saving and Investment by Sector

Retail sales excluding food (annual percent change) *

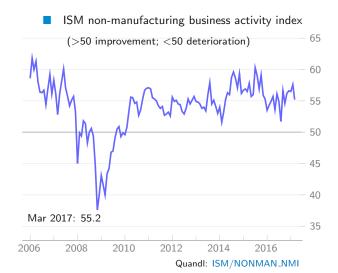

Macroeconomic Indicators: Businesses

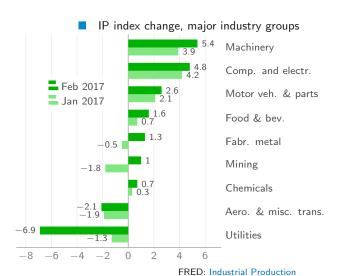

■ ISM manufacturing purchasing managers' index

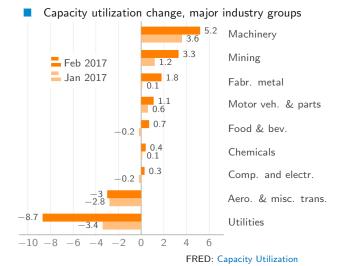

■ Total capacity utilization (percent of capacity)

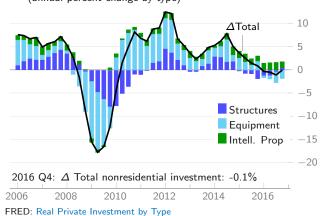

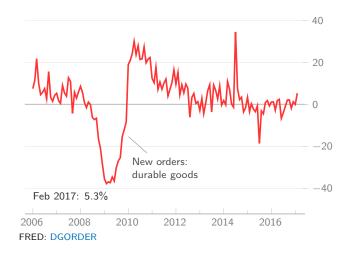

4

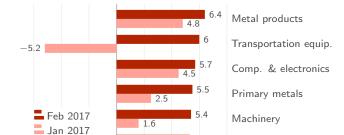

Real nonresidential fixed investment (annual percent change by type)

Destination of corporate profits (percent of GDP) Retained Earnings Dividends Tax Total 12 10 8 2016 Q4 corporate profit as share of GDP: 11.4% 2006 2008 2010 2012 2014 2016

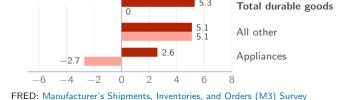

Durable goods new orders (annual percent change) *

FRED: National Income by Type of Income

Durable goods new orders by category

Retail sales, store vs. non-store (annual growth rate)

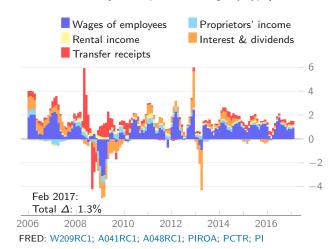

FRBSF tech pulse index (2000=100)

Macroeconomic Indicators: Households

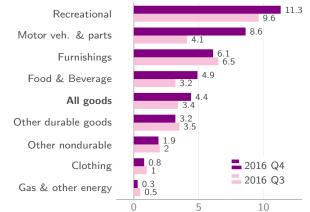

Personal income (annual percent change by type)

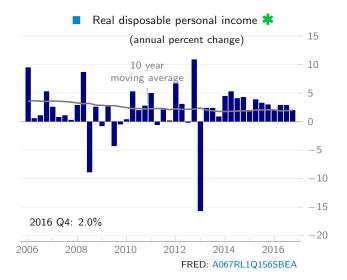

Personal consumption expenditure (PCE)

Real PCE on goods by type (annual percent change)

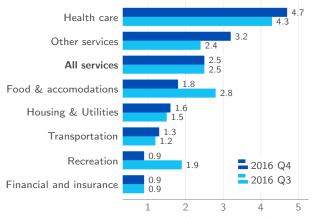

FRED: Real PCE by Major Type of Product

Real PCE by category (annual percent change) Goods Services excl. housing Housing Real PCE 2 2016 Q4: 3.0% -4 2006 2008 2010 2012 2014 2016

Real PCE on services by type (annual percent change)

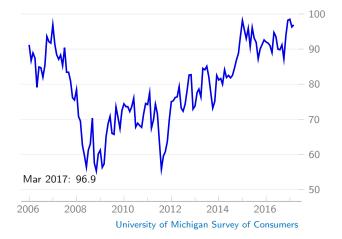

FRED: Real PCE by Major Type of Product

FRED: PCE by major type of product

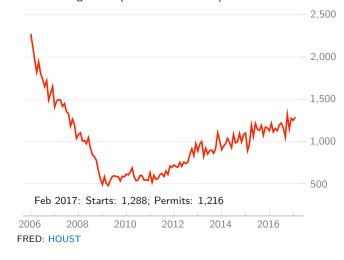

PCE on durable goods (percent of GDP) *

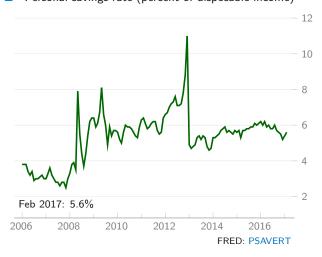

■ University of Michigan consumer sentiment index

New housing starts (thousands of units)

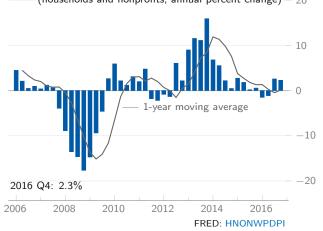

Personal savings rate (percent of disposable income)

■ Household and nonprofits assets (annual growth rate)

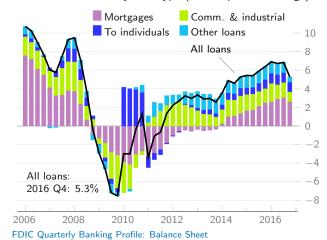

Net wealth as percent of gross disposable income (households and nonprofits, annual percent change) – 20

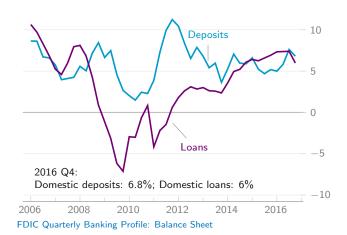

Depository Corporations

Value of bank loans by loan type (annual percent change)
